CARE & MAINTENANCE

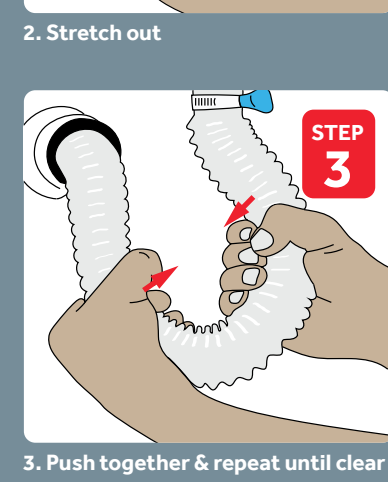

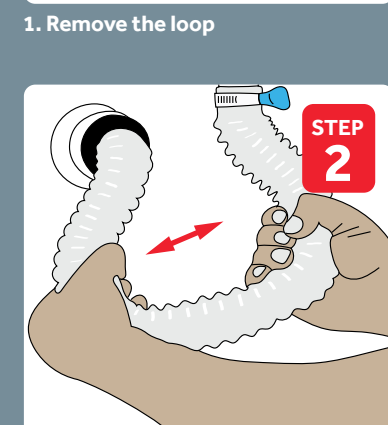

Your Simple Drain® will last for many years to come and is virtually maintenance-free! If it happens to get clogged, you may either: A) Self-plunge by squeezing the clogged area and then stretching and compressing the tube until unclogged, or B) Remove the tube at the waste line, direct flow into a bucket, and run water to rinse out the clog. Drain cleaning products are not necessary but will not harm your Simple Drain®. If your Simple Drain® ever happens to leak, just check the tightness of the clamp or threaded fitting and ensure a clean sealing surface is present.

SELF-PLUNGING!

Watch the self-plunge video at simplifiedrain.com

3. Push together & repeat until clear

UNIVERSAL FIT ALL YOU NEED IS IN THE BOX!
